Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application,

☒ claims Nos. 1-6 (partial)

because:

☐ the said international application, or the said claims Nos. relate to the following subject matter which does not require an international preliminary examination (specify):

☒ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. 1-6 (partial) are so unclear that no meaningful opinion could be formed (*specify*):

see separate sheet

☒ no international search report has been established for the said claims Nos. 1-5 (IA)

☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:

the written form

☐ has not been furnished

☐ does not comply with the standard

the computer readable form

☐ has not been furnished

☐ does not comply with the standard

☐ the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-*bis* of the Administrative Instructions.

REPORT ON PATENTABILITY
(SEPARATE SHEET)**

1. Re Item III.

Claims 1, 2, 5, relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(i) PCT). However, although not required under the provisions of the PCT, an opinion will be given with respect to novelty and inventive step.

Furthermore, due to the expression "conditions in which modulation of the alfa-7 nicotinic receptor is beneficial", present claims 1-6 relate to an extremely large number of possible diseases. Support within the meaning of Article 6 PCT and/or disclosure within the meaning of Article 5 PCT is to be found, however, for only a very small proportion of the diseases claimed. In the present case, the claims so lack support, and the application so lacks disclosure, that a meaningful search over the whole of the claimed scope is impossible. Consequently, the search has been carried out for those parts of the claims which appear to be supported and disclosed, namely those parts relating to the diseases explicitly mentioned in claim 2. The present opinion is limited to the subject matter which has been searched.

2. Re Item V.

The following document have been cited in the search report. Where reference is made to them, the following numbering is used; unless otherwise indicated, reference is made to the passages mentioned in the Search Report:

- D1 :** WO 98/34111 A (TREGA BIOSCIENCES INC) 6 August 1998
- D2:** DATABASE REGISTRY CHEMICAL ABSTRACTS SERVICE, COLUMBUS, OHIO, US; 1998, XP002291222
- D3:** US-A-3 631 050 (ELSLAGER EDWARD F ET AL) 28 December 1971
- D4:** DATABASE CHEMCATS CHEMICAL ABSTRACT SERVICE, COLUMBUS OHIO, US; Accession Number: 2001:2073353 23 April 2003, XP002291223
- D5:** DATABASE CHEMCATS CHEMICAL ABSTRACT, OHIO; 2002, AN: 1940051- 1940080; XP002291224

2.1 Novelty

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1,2, 3, 4, 5, 6, 7, 8, 9, is not new in the sense of Article

33(2) PCT.

D1 discloses pharmaceutical compositions comprising compounds falling in the definition of the compounds of formula I in claim 1, 3 and 6, and their use for the treatment of pain. In view of this prior art, the subject matter of claims 1-6 is not new.

D3 discloses pharmaceutical compositions comprising compounds falling in the definition of the compounds of formula I in claim 3. In view of this prior art, the subject matter of claims 3 is not new.

D4 discloses a compound falling among the list of claim 9. In view of this disclosure claims 7, 8, 9 are not new.

D5 discloses a number of compounds falling in the definition of claims 7 and 8. In view of this prior art, the subject matter of claims 7 and 8 is not new.

2.2 Inventive step (Art.33(3) PCT)

The claimed subject matter which is new appears to involve an inventive step.

2.3 Industrial application

Claims 1,2,5 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(i) PCT).
